

ARIX CANNULATED SYSTEM

MICA Screw System

Indication

ARIX Cannulated System MICA Screw is a cannulated screw designed for minimally invasive chevron and akin osteotomy technique.

MICA Screw System provide the forefoot fixation solution including fixation of the chevron osteotomy fragments of the metatarsal to correct hallux valgus deformity.

Benefits

- Minimally Invasive technique
- Reduced surgical time than conventional technique
- Less incision pain than conventional incision
- Minimize the surgical scar

Chevron Osteotomy

Small Incisions (2~3mm)
